CUSTOM CLASSIC JAZZ BASS® IV & V

00 (3-Color Sunburst)

Subtle refinements to Fender's legendary Jazz Bass make our Custom Classic a true player-centric instrument. This bass features a slightly slimmer waist contour and deeper cutaways for greater access to the upper registers of its 21-fret fingerboard. Five-string players will appreciate the dual-string retainers that increase string tension, especially on the low "B", for better definition and articulation. You'll also love the comfortable 34"-scale neck. The Custom Classic Jazz Bass is available with maple or rosewood fingerboard; Jazz Bass V is offered with a pau ferro or maple fingerboard. The Custom Classic Jazz Bass IV and V feature an alder body on Three-color Sunburst, Olympic White, Black and Ice Blue Metallic; and an ash body on Aged Cherry Sunburst, Ebony Transparent, Bing Cherry Transparent and Cobalt Blue Transparent.

'60 STRATOCASTER®

04 (Daphne Blue)

A detailed recreation of a 1960 Strat both inside and out! Cosmetically, it features a nitrocellulose-lacquered alder body and '60s “C”-shape maple neck complete with clay dot markers, and for the first time in its history – a smaller truss rod and slab laminated rosewood fingerboard. Its three Custom '60s single-coil pickups are accurate to the original, as far as materials and windings, producing a characteristically smooth, glassy tone. Beneath the surface, we've even imitated the crude pickup wire routing in the body cavity and undercoating.

'66 STRATOCASTER®

45 (Teal Green Metallic)

The Time Machine series 1966 Stratocaster guitar is an exact reproduction of one of the most rapidly collectible Stratocaster guitars around, right down to its nitrocellulose-lacquered alder body with a catalyzed undercoat. The “Big Peg” headstock design, early ‘60s “C”-shape neck and “F”-key tuners set this guitar apart and its “transition” logo, Pearloid inlays and “F” neck plate pay homage to a brief but important part of Fender’s history.

07 (Vintage Blonde)

Originally conceived as a model that “could” have been made during the halcyon days of the early '50s, Custom Shop Senior Master Builder Chris Fleming recently designed the Tele Thinline with many of the same features and materials found in early Nocaster® guitars. The one major difference is its thinline, nitrocellulose-finished ash body complete with f-hole (we didn't begin building thinline guitars until 1968). Additional features include a straight-grain, lightly tinted one-piece maple neck, Chris Fleming custom-wound pickups and vintage bridge.

CLASSIC SERIES '69 TELECASTER® THINLINE

00 (3-Color Sunburst)

The semi-hollow body design was originally an attempt to reduce the weight of the alder (or ash on the Three-color Sunburst) solidbody Tele® guitar—the f-hole was a visual clue to its construction. With its reshaped pickguard, this guitar continues to reshape musical styles!

CLASSIC SERIES '72 TELECASTER® THINLINE

21 (Natural)

1972 was a magical year for the Telecaster® guitar. With several new designs, the Telecaster guitar was available with more options than ever before. Each of these guitars is being made like we used to, with alder and ash bodies, “C”-shaped maple necks, bullet truss rods, '70s vintage hard-tail strings-through-body Strat® bridges and three-bolt neckplates. The Thinline also sports dual humbucking pickups, but what sets it apart is its semi-hollow ash body, which has a warmer and rounder sound.

04 (Daphne Blue)

We're proud to reissue the '65 Mustang guitar (which was the first full year of Mustang production). The Mustang was originally one of our 'student models' but was destined for the big time; seen slung over the shoulders of icons like David Byrne, John Frusciante, Kurt Cobain, Todd Rundgren and Adrian Belew to name just a few! This reissue's got great color and cosmetic options, as well as a heightened level of period-correct detailing (body wood, logos, etc.).

DELUXE ACOUSTASONIC™ STRAT®

38 (Crimson Red Transparent)

The Acoustasonic Stratocaster® guitar is the first true acoustic Strat® guitar – the perfect marriage of classic and hi-tech! The Acoustasonic guitar's alder body is hollowed out and topped off with a patent pending brace-less graphite composite top, which has a directional wood grainlike pattern that reacts and sounds like spruce. Three internal graphite rods placed horizontally across the body cavity ensure the integrity of the structure. The bridge, with its built-in controls (to free up the top for full acoustic potential), incorporates a three-piece saddle arrangement for correct intonation with individual piezo pickups under each saddle. The electronics maximize the advantages afforded by the three separate pickups to deliver unbelievable acoustic tone – especially through any of our Acoustasonic amplifiers. The specially positioned and shaped dual sound holes deliver exceptional natural acoustic tone and surprising volume when played without amplification. Couple all this with a bolt-on, 22-fret Fender® electric guitar neck, and you've got the easiest playing and, undoubtedly, most comfortable acoustic guitar made.
