

*Fender*

ELECTRIC INSTRUMENTS / AMPLIFIERS / KEYBOARD / ACCESSORIES

In this catalog you will find a complete presentation of all Fender Electric Guitars, Bases, Amplifiers, Keyboard Instruments and Accessories.

Fender is the only company in the world that can claim distinctive leadership and superiority in electric guitars, bases and amplifiers. We think it's because we have a unique concept—a thorough knowledge and commitment to the research and development of the guitar or bass and the amplifier to function as a unit. One without the other is nothing. Together they are a musical instrument.

You'll find Fender products dependable, well made, and fun to play. Fun because they allow you the full expression of your talent. Fun because they will deliver all you expect from a Fender.

## FENDER ELECTRIC GUITARS AND ELECTRIC BASSES

It all began over twenty years ago when Leo Fender revolutionized music by inventing and introducing the world's first solid-body electric guitar. It was called the Telecaster, and to this day, it remains the most widely used electric guitar in the world.

In the Fender line today, you'll find several variations of the original Telecaster. The Telecaster Deluxe, Custom, and Thinline models feature the new Fender humbucking pick-ups.

Another recent Fender innovation now found on the Stratocaster and other models, is the new micro tilt neck which facilitates action adjustments when using the light gauge strings so popular with today's players.

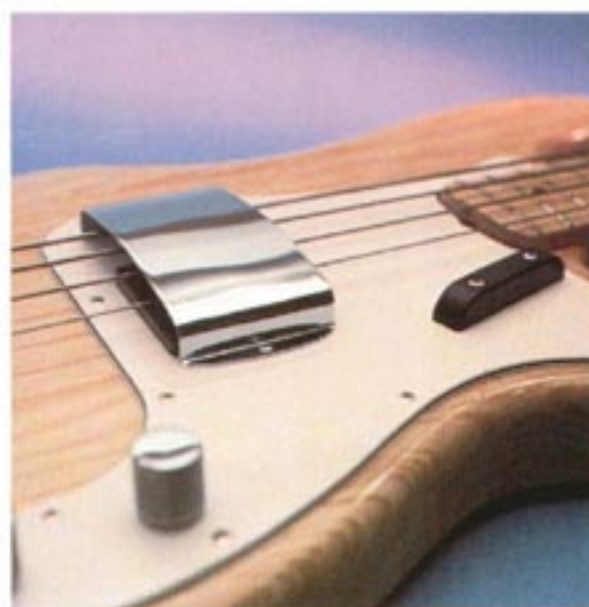

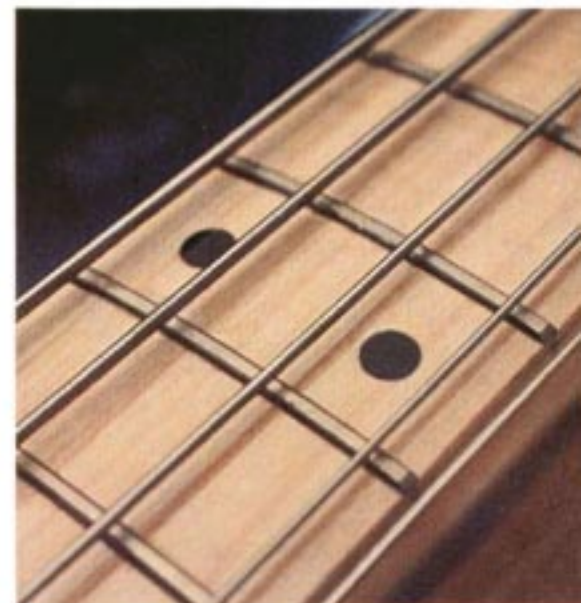

Another Leo Fender "first" was the electric bass. The original Fender® bass opened new vistas to bass players all over the world. A new bass sound was created—one that you could actually hear.

In today's electric bass line, you'll find all of the Fender favorites—the Jazz Bass, Precision Bass, Telecaster Bass and others. The Telecaster Bass is representative of the constant refinements being made in the Fender line and now comes equipped with a humbucking pick-up, micro tilt neck, and the bullet truss rod adjustment.

Many of the refinements and features that have made the Fender line famous over the years are subtle and not readily detectable by the uninitiated. Close examination will reveal the meticulous workmanship and attention to detail that sets Fender instruments apart from all others. While all of our instruments have inner strengths and characteristics, we also make sure that they provide a surface beauty that reflects their quality and your pride of ownership.

Fender models are designed to provide you with complete versatility. Whatever your style of playing, whatever your particular preferences are to color and finish, whatever your budget . . . you'll find a Fender suited to your needs.

Fender guitars and amplifiers are designed to go together and complement each other. Starting on page 35 of this catalog, you'll find a complete selection of Fender guitar and bass amplifiers.

# Telecaster® Deluxe

## 6 STRING SOLID BODY ELECTRIC GUITAR

A brand new Fender guitar featuring two humbucking pickups

- Single piece hard rock maple neck with flat radius and wide frets

# Fender Steel Guitars

## FENDER STEEL GUITARS

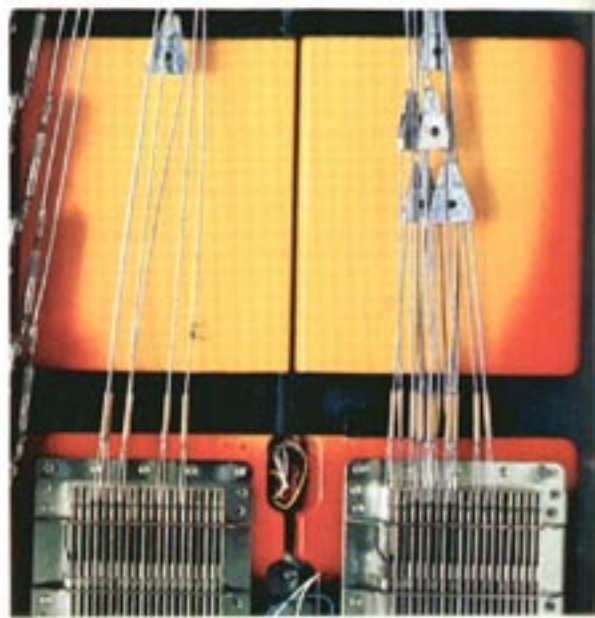

The complete line of Fender Steel Guitars ranges from the all new Professional Series PS 210 Pedal model to the Champ and Studio Deluxe—perfect for the student player.

Fender Steel Guitars feature many exclusive features such as the patented head assembly. The tuning head is fully chromed and recessed into the body of the instrument. Fender makes its own guitar pickups. Every coil in every Fender pickup is hand-wound and tested. They have a wide range and produce a pure distortion-free musical tone.

Fender pedal and steel guitar bodies are made of solid hardwood with Fender's thick-skin® high-gloss finish. Pedal guitar bodies are set in massive 3-inch aluminum-magnesium alloy frames. This combination produces an overall rigidity that prevents intonation problems when the pedals are operated.

The new PS 210 presents major breakthroughs in the design of a pedal steel guitar. Most significant are the new tuning mechanisms. Also an all new linkage system is used eliminating cables, pins, shafts and pulleys to minimize friction and noise. All in all, we feel the PS 210 is the most significant advancement in pedal steel guitars ever.

And to play that Fender Steel Guitar you'll need an amp. On page 40 of this catalog you'll find our new Vibrosonic Reverb Amp. It's designed especially with the Steel Guitar player in mind. Put them together—we think you'll like what you hear.

# PS 210 Pedal Steel Guitar

Designed by Steel Guitarists for Steel Guitarists

Top professionals were consulted to make this the most versatile pedal guitar ever offered

- Easy pedal action with adjustable leverage ratio
- Alter pedal tunings in approximately one minute per string
- Change one to ten strings per pedal
- Each string can be raised or lowered to a different note by each pedal
- Quick clamp latches on pedal board provide fast set-up
- Thumb screws on pedals to minimize slack and noise
- Side-to-side adjustment on foot pedals and knee levers provide desired spacing
- Up to four knee levers available

## BODY

Frame is one piece welded aluminum construction, adding brilliance and depth to the tone  
Heat bonded walnut burl color inlay

## NECKS

Solid curly maple  
23-inch scale  
27 frets on each neck  
11 position markers on each neck  
20 roller style tuner assemblies  
Bridge to nut distance is controlled by the neck, minimizing de-tuning when temperature changes

## TUNING MECHANISM

Tuning mechanism offers precision tuning and allows faster string changing  
Excess string length is eliminated allowing much greater sustain  
Extra travel is provided giving more than ample allowance for string stretch  
Tuning can be done with the right hand while holding a chord with the left

## PICKUPS

Wider frequency and more powerful  
Extra magnets are provided to add fullness to the first and tenth strings

## CHANGER UNIT

New tuning changer and linkage system eliminating cables, pins, shafts and pulleys to minimize friction  
The changer unit is to the left of player with minimum angle and roller bridges to insure perfect intonation and eliminate string breakage  
To change tunings, simply add, move, or adjust tuning screws as required

## PEDAL

Foot pedals, knee levers and pickups are shifted from one neck to the other with a single lever  
All nine pedals and/or knee levers operate on inside neck. Seven operate on the outside neck  
Travel adjustment screws are provided for positive pedal stop

## STANDARD ACCESSORIES

Hardshell plush lined case  
Guitar cord, polishing cloth, diagonal cutters and screwdriver  
Rubber-tipped telescoping tubular steel legs

## OPTIONAL ACCESSORIES

Fender volume pedal  
Fender tone and volume pedal  
Natural, curly maple finish with brushed aluminum frame and walnut burl inlay

# Pedal 2000 and Pedal 800 Steel Guitars

STUDIO DELUXE

CHAMP

# Steel Guitar Sets

Matched steel guitars and amplifiers. Ideal for students and beginners.

- **Champ Set** consists of single neck 6-string steel guitar with adjustable high-fidelity pickup and rugged Champ amp with 8-inch wide range speaker. Includes hard shell case for guitar.

- **Studio Deluxe Set** consists of a deluxe single neck 6-string guitar with adjustable high-fidelity pickup and heavy-duty Princeton amp with 10-inch custom-designed speaker. Includes hard shell case for guitar and telescoping tubular legs

## FENDER CHAMP SET

Guitar boasts a solid hardwood body, beautifully finished and distinctively designed. Both the tone and volume controls have been placed for easy access. Other features include an adjustable bridge, high-fidelity pickup, and one-piece recessed patent heads.

The Champ Amp is sturdily constructed and provides extremely pleasing reproduction with a fine quality speaker. Front panel control section has two instrument inputs, volume, treble and bass controls, on-off switch and pilot light. (See page 53 for additional Champ Amp features.)

## FENDER STUDIO DELUXE SET

The Guitar provides these outstanding features: adjustable high-fidelity pickup, hardened steel bridge and precision grooved nut; swing-style bridge cover; top-mount input jack; recessed one-piece patent head assembly; and chromed inset leg flanges for telescoping legs.

The Princeton Amp has the following front panel controls: volume, treble, bass, vibrato speed and intensity. It features a heavy-duty 10" speaker. (See page 52 for additional Princeton Amp features.)

A separate leg compartment is built into the guitar case. It is covered with the same durable material used on the amplifier.

## BODY

Master tone control

## STANDARD ACCESSORIES

Guitar cord, polishing cloth  
Hard-shell plush lined case

## OPTIONAL ACCESSORIES

Rubber-tipped telescoping tubular legs  
Blond finish only

# Fender Amplifiers

## FENDER AMPLIFIERS

Ask a musician to name the top name in amplifiers. He'll come up with Fender. For almost a quarter of a century Fender has been the most popular amplifier used by amateur, semi-pro and professional musician alike.

There are many reasons why Fender has achieved this reputation and position of leadership.

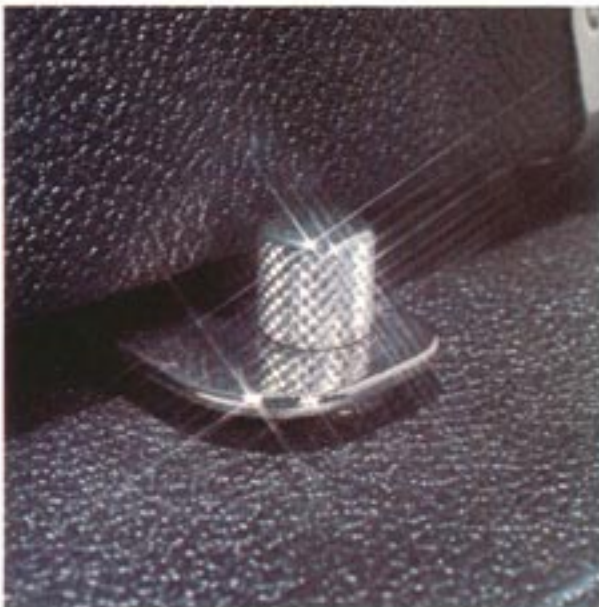

The Fender sound is unique! This is no accident—it was designed into our amps from the start. Fender amplifiers do not merely reproduce sound. They work in conjunction with Fender guitars and basses to function as a musical instrument and *create* sounds.

Fender amps are dependable! They sound better because they're made better. They're made to travel, and they're made to play at peak power for long periods of time.

One of the latest Fender innovations is the Master Volume Control. This deceptively simple-looking knob provides a whole new era in amplifier control. Used in conjunction with pre-amp controls, the musician can distort or adjust the "body" and harmonics of the sound, and at the same time control the overall volume level. This provides the flexibility of having the traditionally "clean" Fender sound or a distorted sound without the need of external fuzz devices.

Leo Fender developed the original electric bass amp. The Fender bass amplifier line has been broadened and now ranges from the Musicmaster Bass, which is perfect for the beginning or student player, all the way up to the thunderous 400PS which cranks out 440 watts RMS and 980 watts peak music power.

Take a good look at the Fender line. Whether you play "rock," "country," or "jazz" you'll find a Fender amplifier to suit your taste and your pocketbook. Match it up with the Fender guitar or bass of your choice and you've got the ultimate combination.

# Dual Showman® Reverb

One of Fender's top piggyback amplifiers used by professionals around the world

- 100-watts RMS power with 220-watts peak music power for high-performance amplification
- Two 15" JBL speakers mounted in specially designed baffles for unexcelled sound projection

Power requirements: 117 volts, 60 cycle AC

## OPTIONAL ACCESSORIES

Heavy duty black vinyl cover

# Fender Rhodes® Keyboard Instruments

## FENDER RHODES KEYBOARD INSTRUMENTS

This fine line of keyboard instruments had its beginning during World War II when its inventor Harold Rhodes made pianos for wounded convalescing G.I.s out of scrap airplane parts. Progress in tone and reliability has been steady over the intervening years.

Today's Fender Rhodes electric piano offers many unique features. Our patented tuning fork principle produces clearer and truer notes. There are no strings to go out of tune. No unsupported reeds to short out or break.

Our pianos are built to travel. Each model packs into a compact unit that can take the abuse of travel and still be ready to play beautifully when set up.

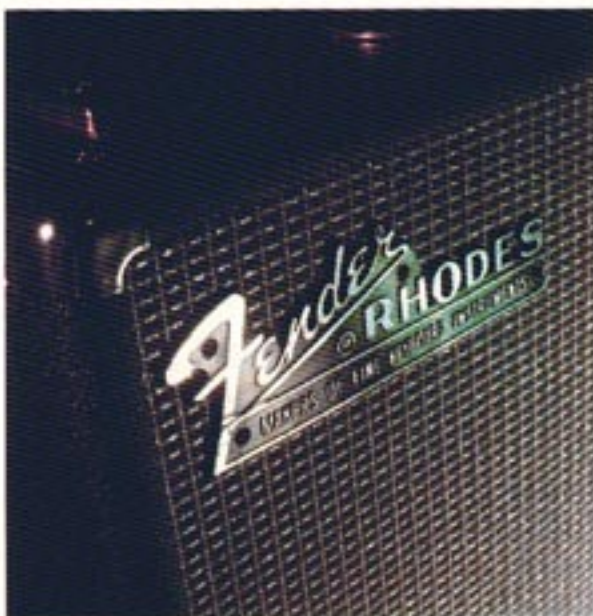

One spectacular innovation is a remarkably increased dynamic response to touch variations. What was already outstanding is now even more dramatic.

Other innovations just now being introduced are the 88 note keyboards and the matched Satellite Power speakers designed especially for the Stage Pianos.

The "88" has unmatched clarity and depth in the bass range as well as brilliantly clear, resonant highs in the upper range.

The Satellite Speakers introduced literally by request offer the ultimate in sound dispersion. When coupled with the Fender Rhodes pre-amp and with vibrato "on," the already famous stereo effect is even more spectacular with these two speaker cabinets situated as much as 35 feet apart.

Play a Fender Rhodes piano. A short personal trial will be the best proof of any claim we could make.

# Fender Rhodes® Suitcase Piano

## 88 OR 73 KEY ELECTRIC PIANO

The portable electric piano that's on the go everywhere

- Touch dynamic keyboard action
- Tone produced by tuning fork principle. No reeds to break, no strings to go out of tune
- Versatile—built-in volume, tone and vibrato controls provide outstanding flexibility
- Built-in sustain pedal
- Self-contained amp and speakers

- Packs into two fully enclosed units rugged and portable

### SPECIFICATIONS

#### KEYBOARD SECTION (SUITCASE TOP)

# Accessories

## HARD SHELL PLUSH LINED CASES

Strong, sturdy. Covered with rich scuff-resistant Vinyl. Double stitched seams. Interior lined with soft, velvet like material.

## ECONOMY CASES

Lower priced version of hard shell case. Covered with scuff-resistant Vinyl with single stitched seams. Flannel lined. Available for Mustang, Bronco and Musicmaster guitars.

## ECONOMY CHIPBOARD CASES

Soft shell flannel lined case available for Mustang Bass and Musicmaster Bass.

## STRINGS

Fender Strings are a long time favorite of professionals and students alike. Fine quality strings offer maximum sound and durability. Available in a wide variety of types and gauges.

## POLISH AND POLISH CLOTHS

Polish cloths are chemically treated and long lasting. Polish comes in 6 oz. aerosol cans and acts as a non-oily, non-abrasive finish preservative. For all finishes and hardware.

## STRAPS

Leather straps have snug-fitting, shoulder section and extra length for maximum adjustment. Woven cloth straps are adjustable and are available in three different color patterns.

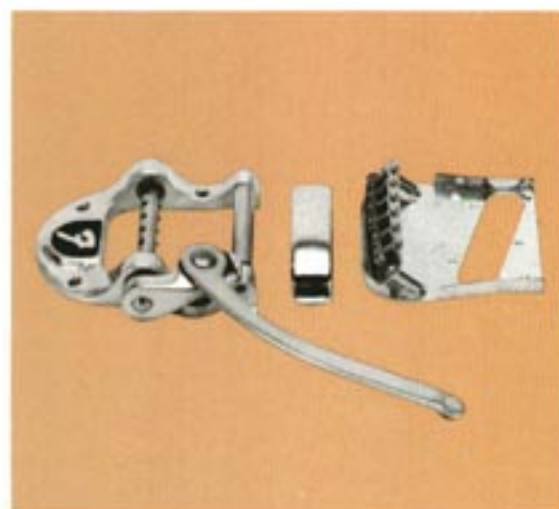

## CORDS

Deluxe, extra-heavy-duty, insulated cords are well shielded for maximum noise reduction. Available in several different types and lengths.

## PATENT HEADS

Set of individual machine tuning heads with all necessary mounting hardware. Guitar patent heads available with either white plastic or chrome plated tuning knobs. Bass patent heads available with chrome plated tuning knobs only.

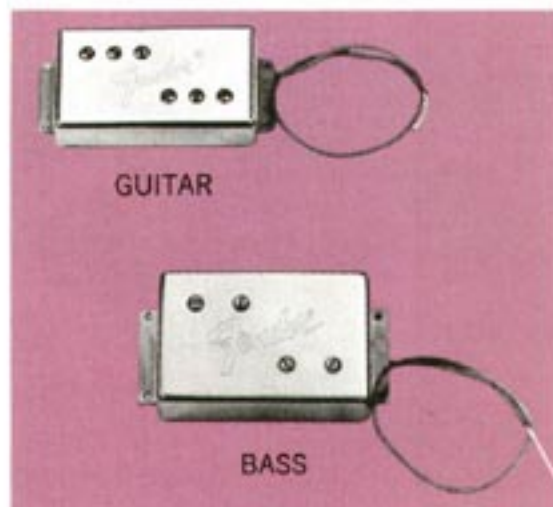

## TREMOLO KIT

Bigsby designed tremolo unit for Fender Telecaster guitars. Features a "floating" master bridge with six individual bridges—each adjustable for length and height. Installation instructions and hardware included.

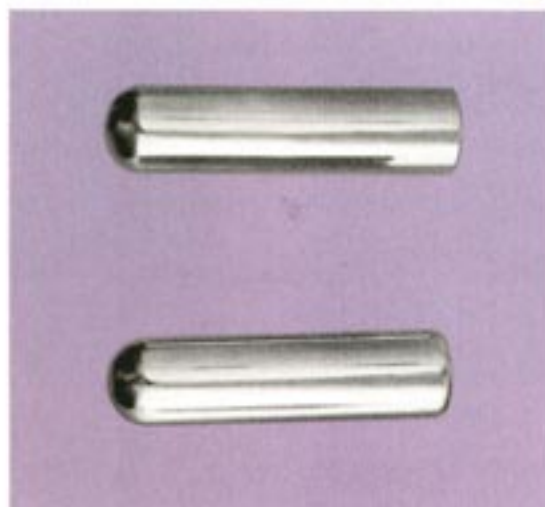

# Accessories

## HUMBUCKING PICKUPS

High output double coil humbucking pickups. Adaptable to most guitars and basses. Mounting instructions and hardware included.

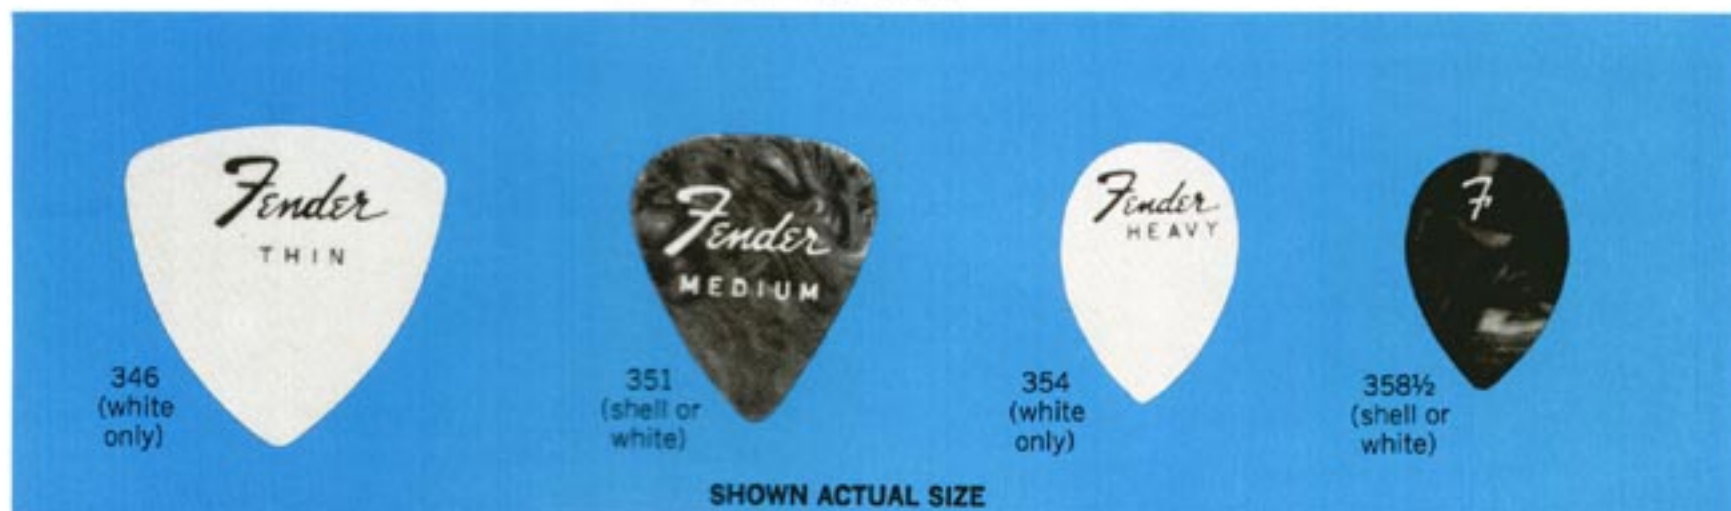

## STEELS

**HOLLOW:**  $\frac{7}{8}$ " diameter by  $3\frac{3}{4}$ " length. Heavily chromed plated brass. Weight 6 ozs. **SOLID:**  $\frac{7}{8}$ " diameter by  $3\frac{3}{4}$ " length. Highly polished solid stainless steel. Weight 9 ozs.

## CAPOS

Fully adjustable. Durable and colorful elastic material. Available for 6 or 12 string guitars and all banjos.

## PICKS

Fender professional guitar picks are preferred by guitar players throughout the world. All picks illustrated are available

in thin, medium or heavy weights. In addition to flat picks, Fender offers a wide variety of thumb and finger picks. See

the Fender Price List for a complete listing of available types and styles.

## COVERS

Waterproof, tear and abrasion-resistant covers are available for all Fender Amplifiers, Enclosures and Keyboard Instruments. Lined with soft flannel.

## FIBER CASES

The ultimate in protection for equipment subjected to frequent transportation. Larger cases are equipped with casters for ease of moving. Available for most Fender Amplifiers, Enclosures and Keyboard Instruments.

## HANDLES

Metal reinforced and contoured for comfort. When installed, these handles lie flat between bright, heavily plated end pieces. All necessary mounting hardware included.

# Accessories

## CORNERS

Offer maximum protection for Amplifier, Enclosure and Keyboard cabinets. Packed four to a set and heavily plated. Mounting screws included.

## UNIVERSAL STAND

Designed to adapt to most amplifiers and P.A. tops, this stand offers convenience casters and heavily plated all metal components. An excellent stand for many of the more compact self-contained amplifiers such as the Fender Vibrosonic Reverb, Twin Reverb and Pro Reverb.

## FOOT SWITCHES

Single button foot switch designed for remote control of Amplifier vibrato. Double button foot switch designed for remote control of Amplifier reverb and vibrato. Heavy-duty.

## FUZZ WAH PEDAL

Wah Pedal with built-in fuzz effect. Maximum control over degree of fuzz and wah. On/off switch for both fuzz and wah. Attractive and durable.

## TONE AND VOLUME PEDAL

Controls tone response and overall volume with one pedal. Side to side action for tone control, up and down action for volume control. Attractive and durable.

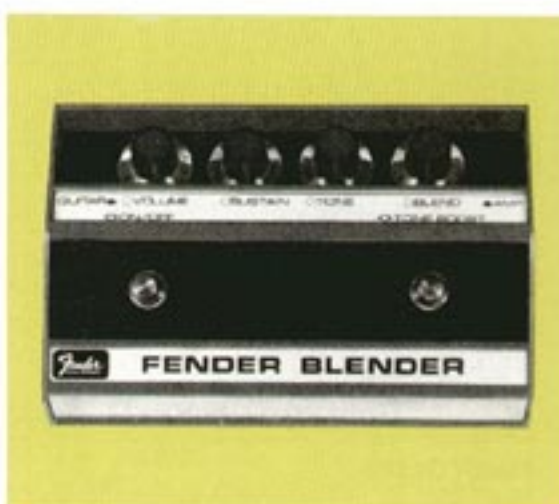

## VOLUME PEDAL

Controls volume level with smooth up and down action. Attractive and durable.

## THRONE

Fully adjustable, chrome plated durable stand with foam padded seat cushion. Adjustable heel rest. Back rest included. Folds compactly.

## FENDER BLENDER

Fuzz and sustain unit for sound modification. Blends and sustains tone to any pre-set level.

## PIANO BASS STAND

Heavy duty fully adjustable stand for Piano Bass. Folds compactly.

# The Fender Story

## HISTORY

Fender Musical Instruments was founded in 1946 by Leo Fender. Destined to become the world's largest manufacturer of electric guitars, basses and amplifiers, the firm was acquired in 1965 by Columbia Broadcasting System, Inc. Other famous names in the Musical Instrument Division of CBS include Steinway & Sons (pianos), Leslie (organ, piano, and hi-fidelity speakers), Rogers (drums), Rhodes (electric pianos and basses) and V. C. Squier (strings).

## RESEARCH AND DEVELOPMENT

Development and perfection of new products and continuing refinement of existing products characterizes our R&D group. Fender is the only company in the world that can claim distinctive leadership and superiority in electric guitars, basses and amplifiers. This is because we have a unique concept—a thorough knowledge and commitment to the research and development of the guitar or bass and the amplifier to function as an integrated unit. Each unit is specifically designed to work with the other. Together they are a musical instrument. Fender's research and development group has more engineers, technicians and musicians than any other company in its field. Becoming the leader wasn't easy. We intend to stay there!

## MANUFACTURING

We don't stop with inventing, developing and improving products. Musical instruments have to be dependable and fun to play. Each step in the manufacturing process is designed with quality and you in mind. Skilled people who enjoy and take pride in their work and a rigid inspection program maintain the Fender standard of quality. Every instrument is fully tested and played before it leaves our factory. Our people like their work and it shows.

## SERVICE

What about after you have owned a Fender for a few years and it may need some service? We're here to help. Every franchised Fender dealer must have the ability to service our products. In addition, we provide a factory service center with highly skilled technicians who can service every instrument we now make or have ever made. Fender products will take years of use, but in the event something does go wrong, it's nice to know someone will always be there to take care of it.

## AUTHORIZED DEALERS

Fender products are sold only through authorized dealers. These dealers are selected to provide you with the assistance and service that you need. If you are interested in any of our products, visit your nearest Fender dealer. He's an expert and can tell you all you need to know about Fender. You'll also find he is a good man to do business with.

## FENDER FINISHES

Fender thick-skin® high-gloss finishes provide Fender instruments with an outer beauty that is both durable and attractive. All Fender instruments are hand-finished under exacting environmental control to provide a silky-smooth mirror-like gloss. You can choose the all-new natural finishes, custom colors or the traditional sunburst design.
